

## Lighttools® Stretch Frames and Soft Egg Crates for Mola Reflectors

To keep your product securely attached to the Mola follow these simple steps:

1. Lay the stretch frame on a flat surface ensuring that the loop or fuzzy side of the fabric sleeve is on the inside.

2. Attach Soft Egg Crate to Stretch Frame using hook and loop connection.

3. Use clips with fabric loop tabs to attach the Stretch Frame to the Mola Reflector. Self adhesive fabric hook sections are included for attachment to your reflector. Clean the reflector with the alcohol wipes (also provided) before adhering the fabric hook to the reflector.

Your Mola with stretch frame and soft egg crate in place is ready to use.
